PROTECTING OUR LONG-TERM CARE RESIDENTS

WHAT WE KNOW FOR SURE ABOUT NOVEL CORONAVIRUS 2019 (COVID-19):

▪ COVID-19 spreads easily and can make people very sick.
▪ COVID-19 has a higher death rate than influenza (flu) or other common viruses.
▪ Elderly people and people with chronic diseases are more susceptible to COVID-19.
▪ We do not have a vaccine or cure right now.

PLEASE HELP US KEEP YOUR LOVED ONES SAFE BY FOLLOWING OUR NEW POLICIES.

Social distancing and quarantining are the best ways to stop the spread of the virus and to stay safe. This means a change in our visitation policies, so we can do everything possible to keep COVID-19 away from our residents.

▪ Wash your hands often, using soap and water.
▪ If soap and water are not available, use hand sanitizer.
▪ Wear protective clothing (masks, gloves and gowns, when appropriate).
▪ Clean surfaces, especially frequently touched surfaces (tables, doorknobs, light switches, sinks and faucets, remote controls, etc.).
▪ Monitor all staff and residents every day for signs of illness.

We know this is hard on everyone. We can help you with alternative ways to communicate with your loved ones. We do not know how long these policies will need to stay in place, but we are following the best advice from expert scientists and doctors. Thank you for your cooperation!
