Thank you to WY State Survey Agency and CMS Region VIII for funding this CMP Grant

Implementing Culture Change throughout Wyoming;
Affecting Resident-Directed Living and Team Member Retention

Wyoming Retirement Center
Basin
Marla Taylor-Thomas, Culture Change Project Lead
Joined even later than mid-way Year 1 and completed all of Year 2
Practices Chosen

1. Snacks readily available
2. Other team members lead/involved with activities
3. Outdoor preferences on care plan
4. Community meetings
5. Mailboxes
6. Language shift

4. Snacks/drinks are easily available for residents at all times without having to ask, i.e., in a stocked pantry, refrigerator or snack bar. (Refer to CMS F809 – Frequency of meals / snacks at bedtime)
The Snack Attack

Snack Bar

“Makes me happier than a fat cat.”

“Saves time. A little bit of a mess but would take it over the time to get all those options and lots of residents happy to have it.”

Nutrition Tip posted

Graham crackers – melt in mouth = pureed consistency

Infection control appropriate

Researched right machines

Replumed

Community members now asking for ice machines – researching

Foundation of Youth?

Hydration Station on runs/bikes

No name/title/label
127. **Team members other than activities/recreation regularly engage** residents individually or by leading groups of interest to residents.

2/2/22 Day

All team members filled in when lacked restorative team

Nate Miller
Maintenance Manager
Projects
“He was glowing. You have to keep doing this. I haven’t seen him like this for a long time.” Wife of WRC community member involved in project
More life outside
Outside preferences on care plan
133. The home uses non-institutional language in all documents (clinical charting, job descriptions, policies and procedures) and verbal interactions, and provides periodic training to all team members to remove institutional language.

Resident Preferences Form became Tell Us about You Grievance Form to Concern Form
Community Meetings

- Discovered community members really appreciate having team members able to connect
- Tried varying agendas
- Paused due to covid
- Working on ways to increase interaction
Wyoming Retirement Center

Artifacts pre-project tallies
• Fully Implemented 40%
• Partially Implemented 34%
• Not implemented yet 26%

Artifacts post-project tallies
• Fully Implemented 59%
• Partially Implemented 21%
• Not implemented yet 20%

Outcomes

Community members extremely pleased with:
• Getting own mail
• Getting own snacks
• Getting own drinks/coffee
Life Care Center of Casper

Life Care of Casper joined mid-year of Year 1
Oct. 2021 – March 2023

Meaning and Purpose/Volunteerism
Artifact 37. The home engages residents in volunteerism according to each resident’s individual preference.
Community Member (resident) leads Exercise video clip

Class offered explaining volunteer opportunities
• Artifact 4. Residents are supported to prepare and/or serve food per their preferences and abilities (in addition to cooking groups).

• Now Admin./then DON Stacey Caldwell admitted, “We’re not taking advantage of our open dining. We just make people do what we think they should. We don’t ask the person what they want. We’re totally institutional still.”

• Artifact 3. Each meal is available for at least 2 hours, and residents can come and go when they choose. (Refer to CMS F809 Frequency of meals, Alternate dining times)
Added Continental Breakfast

Designed to support sleeping until you wake naturally

Artifact 6. In addition to snacks (described in #5), residents can order food from the kitchen 24 hours a day, and team members are empowered to provide food upon resident request.
• Artifact 18. The home **supports each resident’s natural awakening** rather than waking residents on a set schedule. (Refer to CMS F561 Self-determination)

ADON Cherie Marsh really took this on:
• “Preferences are not schedules.”
• “This is not a facility this is their home.”
• Quiet Hours “There are sleeping people here.”

“Have you toileted yourself today?”
Cherie ADON “absolutely ridiculous.”
Artifact 133. The home uses non-institutional language in all documents (clinical charting, job descriptions, policies and procedures) and verbal interactions, and provides periodic training to all team members to remove institutional language.*
Mailboxes

Artifact 71. Resident rooms have mailboxes at the room entry or in a central mail location.
68. Institutional, over-the-door call lights have been replaced with alternatives such as porch lights at the side of resident room doors or a silent communication system.

Artifact 28. Individual memorials/remembrances are held at the home to honor individual residents upon death.

Artifact 29. Meaningful rituals are in place for residents and team members to recognize and process death, e.g., bedside memorial, chimes announcing a procession out the front door, special book for memories.
• 105. All residents have a team member assigned to them to serve as a “troubleshooter.” Assigned team members are responsible for 1 or 2 residents ensuring ongoing coordination of care and services across teams/departments, and response to residents’ needs, preferences, and requests.*
  • Inspired us to resurrect Guardian Angels to be more about the person, not the room

• Artifact 112. The home has a standing culture change task force/committee/team with a broad representation of residents/family members, supervisory and direct care team members from various shifts, administration, and nursing leadership.

Outcomes

Artifacts pre-project
• Fully Implemented 25%
• Partially Implemented 49%
• Not implemented yet 25%

Artifacts post-project

Westward Heights

Participated in Year 2 of the Culture Change Project
April 2022-March 2023
How it started

• Observed that team is so stressed.

“Just start talking about it”

• Why do we wake residents? Meds. Breakfast.
• Asked evening shift team members: What do you do if resident doesn’t want to go to bed? I just reapproach them and ask again later.
• What if they say no still? Let the nurse know.
• Let’s say 5 residents don’t want to go to bed. Upset. Why? Because that’s my job. Impression is that evening shift didn’t do their job.
• CNA: It’s my job b/c its 7 pm. I only have 2 hours to “put these residents down” and finish charting, etc.
Ask Why and Why not?

• 20-some years been doing this and never looked at this...
• “Will help with retention, will help with our stress. Not: I have to get everybody up or dining room mad at me. The institutional way creates problems.”

How to begin

Started with one neighborhood
• Lots of communication
• They start asking why also, why are we doing this?
• “Challenge the way it is.”
Personalized medication times

**Review of meds**

- Medications, in general, were discontinued.
- Pharmacist involvement has become proactive.
- Fewer pills for the person.
- Calcium, some vitamins not assimilated in older age.
- Moved timing of meds so as to not interfere with sleep at night nor in the morning.

**Relaxed, flexible med pass**

- Learn patterns
- Honor patterns
What is your professional worldview?

**Outdated Nurse Worldview**

- The outdated, typical, traditional, institutional nurse “worldview” is “I wake you up, at this time.”

Natural and well received

- It is working.
- Residents and families loving it. Its natural now. Natural now for us to ask, “Would you like your meds earlier or later?” Its natural now but we never, NEVER asked this ever before...
A NEW NORM

SHIFT
• RESIDENT tells new nurse that the timing of the medications is not working for her because you just woke me up! Asks nurse to please change med time. Nurse has to ask if this is okay!

Shorter med passes

SAVE TIME
• The more organized meds are, the less time it takes.
• Give at their preferred time. No arguments.
• Med aides have more time with residents.
• Many want at bedtime instead of meals b/c they get so full.
AMAZING OUTCOMES

• No more bowel and bladder records.
• No more sleep records.
• Night shift loves it.
• Residents well rested.
• More peaceful, quieter.
• Less stress for residents.
• Less stress for CNAs.
• Families appreciate our new focus on honoring sleep. We are more aware.

What about skin?

SKIN IMPROVED
• Scared about skin and pressure ulcers.
• Worried if we don’t turn, and “check and change every two hours” will get skin breakdown.
• Actually surprised, skin issues decreased and skin improved.
Better on the budget

Fewer staff needed

• Since not waking residents in the morning, need fewer team members.
• Had 1 nurse and 4 CNAs. Now 1 nurses and 3 CNAs on nights (12-hour night shifts).
• Reduced med aides. 5 hours/day reduction.
• Everything is more relaxed.
• So much more manageable.
• Don’t need the overtime.

This is person-directed

Improved quality of life

• No more “I have to go get someone up.”
• A person with dementia wakes up better, is well rested. Its so nice for them to not be woken up. “Its so nice, only one time a night do I check on her now and I don’t get the look that she wants to kill me.” Awake during evening movie. Now 9-10 coming, was 1-2.
• Less napping/falling asleep at breakfast/more engaged during day
“Time to check on the resident and not just on the clock.”

Monica Davis RN, MDS Coordinator
Westward Heights, Lander, WY

Sleep Hygiene
• Learned in nursing school
• What is it?

Sleep Preferences
• What do you need for a good night’s sleep?
Choice in Breakfast

• Offering a cold breakfast outside of the hot breakfast time.
• We never even asked if someone wanted to eat/was hungry.
• We train people to go to mealtime and snacks and then they gain weight, 20 pounds and then need an “intervention” to get back to baseline and that is a trigger on MDS because of weight loss!
• Most if late lunch might skip lunch and eat supper.
Outcomes

• Retention Rate annual: 86% last 12 months; 12 months prior was 69%
• Retention Rate quarterly:
• Bonuses 68,000 to ZERO
• Decreased overtime from 160-200 hours to 120 hours

Artifacts of Culture Change 2.0

1. Artifact 3. Each meal is available for at least 2 hours, and residents can come and go when they choose. (Refer to CMS F809 Frequency of meals, Alternate dining times)

2. Artifact 18. The home supports each resident’s natural awakening rather than waking residents on a set schedule. (Refer to CMS F561 Self-determination)

3. Artifact 22. Medications are delivered according to each resident’s individual daily rhythms such as waking and dining (rather than assigned clock times).

4. Artifact 19. Each resident’s preferences for a good night’s sleep are known and provided such as preferred light level, pillows, blankets, and desired bed clothes.

Wyoming Culture Change Coalition
BIG GOALS for WYOMING NURSING HOMES

BIG GOAL #1
Every person working in a WY nursing home receives culture change training.

BIG GOAL #2
Every resident of a WY nursing home sleeps until they wake up. Natural awakening is a gift; uninterrupted, restorative sleep improves physical health, psychosocial wellbeing, quality of life.
